The Challenge – Two Floating Assets. One Campaign.

- Offstation two floating UKCS assets
- One integrated decommissioning campaign
- A compressed delivery schedule driven by CoP and yard access.
- A constrained marine market.
- A rapidly expanding decommissioning supply chain
- Multiple stakeholders with a single objective: safe and efficient operations

What Subsea7 Delivered

- ✅ Campaign planning & engineering
- ✅ Vessel strategy & marine operations
- ✅ Interface & Supply Chain Management
- ✅ Specialist decommissioning tooling

- ✅ DSV flushing, barriers & disconnects
- ✅ Alba FSU disconnection & tow
- ✅ Stella FPF-1 disconnection & tow
- ✅ Mooring, pile, riser & subsea structure recovery

- ✅ Waste management & recycling
- ✅ Delivery to safety & contract milestones

First Marine Solutions – An Integrated Delivery Partner

One integrated project team

- FMS embedded within the Subsea7 project team from early planning through offshore execution, bringing marine expertise into the wider project team.

Connected across the marine scope

- Marine spread selection and assurance.
- Engineering and procedures for heading control, stationkeeping, mooring disconnection, and towage and handover.
- Survey and positioning across the Stella and Alba fields, integrating six assets.
- Offshore marine personnel and bespoke towage equipment.

Continuity through delivery

- Continuity from project planning through offshore delivery.
- Integrated decision-making offshore during complex marine operations.

Connected Delivery in Practice – Results

Delivered Against Commitment:

- Stella FPF-1 delivered to contractual milestones
- Alba FSU delivered to contractual milestones
- Recycling targets exceeded ~99%
- Complex offshore campaign safely executed

Lessons Learned:

- Build the team before the schedule.
- Select specialist partners early.
- Keep engineering and execution connected.
- Create one team culture
