

HUNTING

OEUK Offshore Decommissioning Conference 2026

Small Interventions, Big Impact
Driving Decommissioning Efficiency Across the WBS

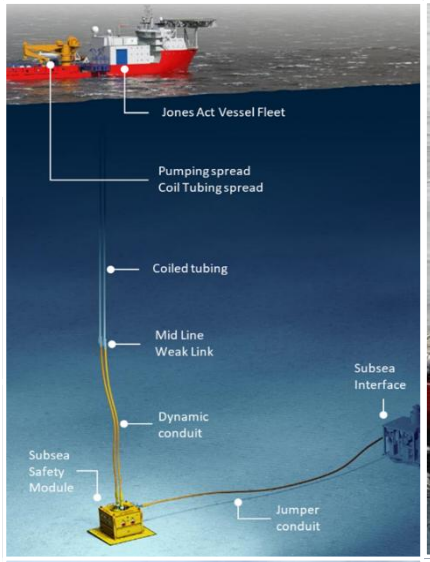
Georgina Steinbach

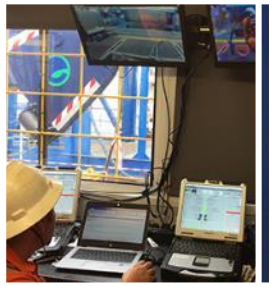
24th November 2026

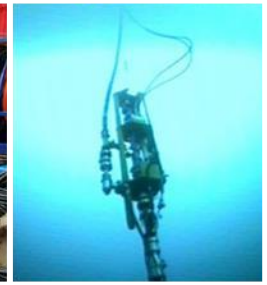
Subsea Intervention & Decommissioning Services

HUNTING

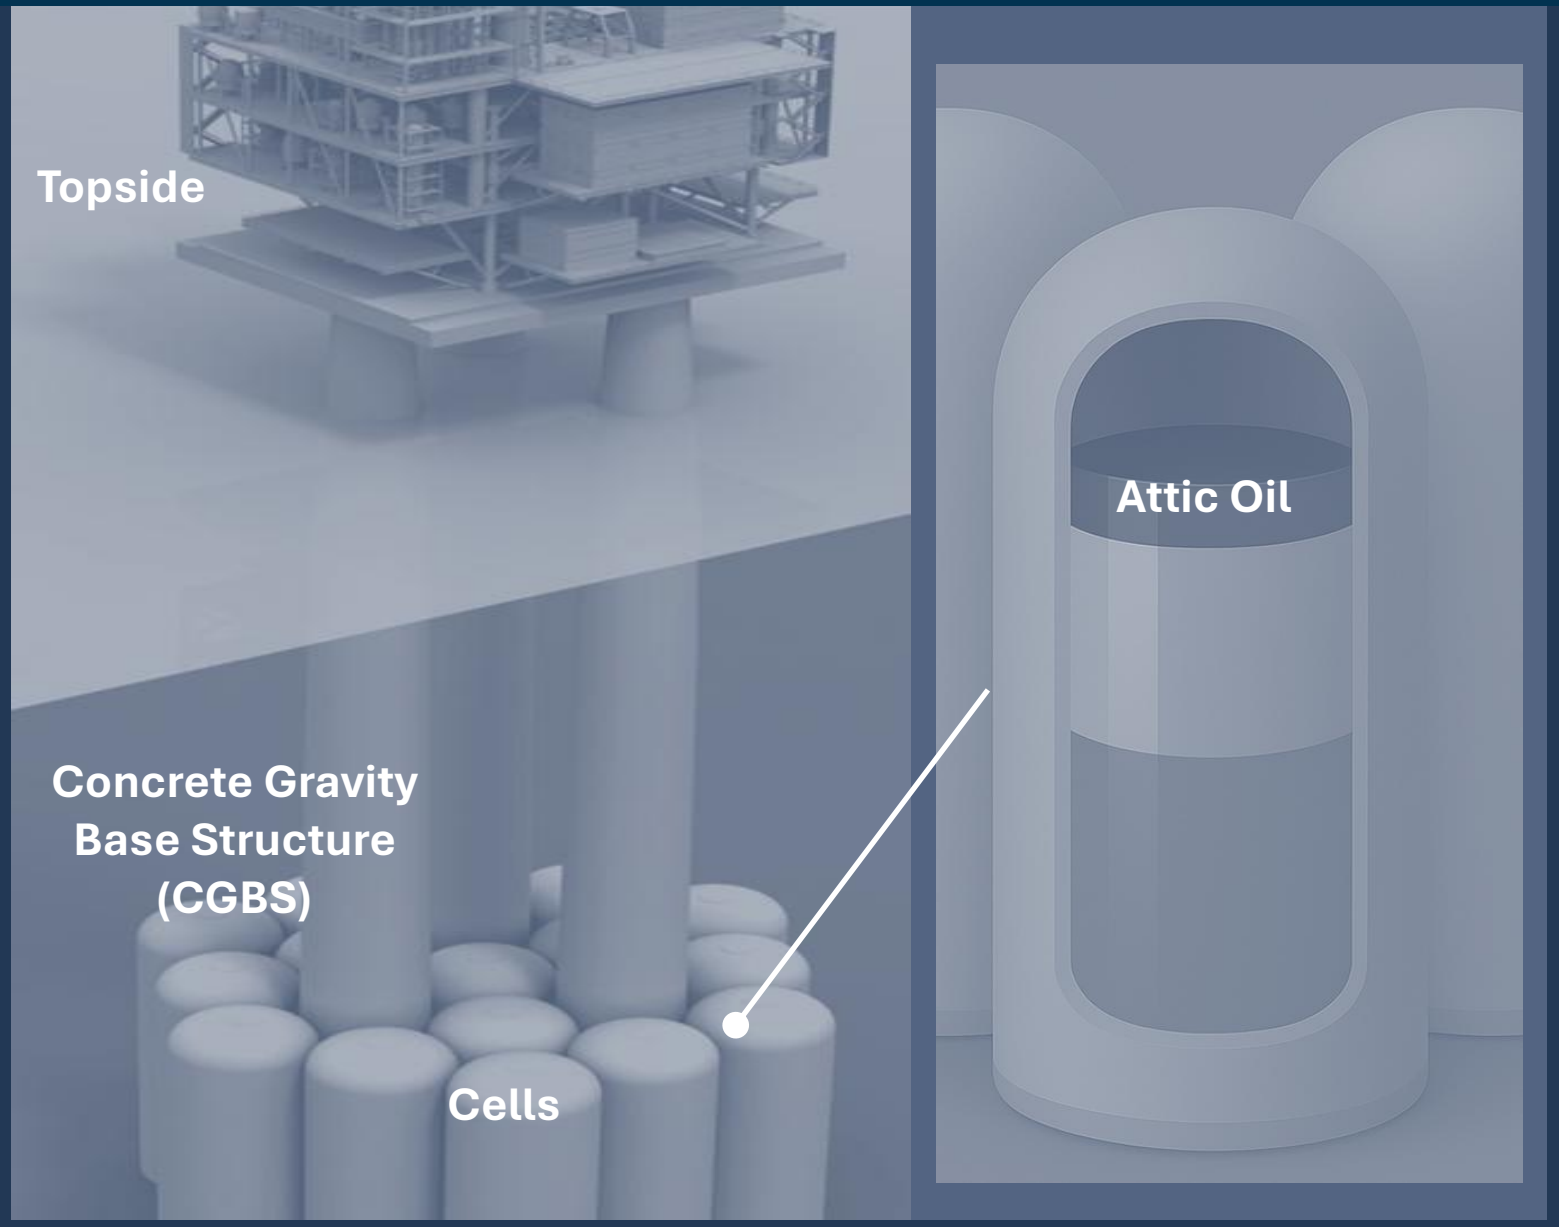
- Hydraulic Intervention
- Attic Oil Recovery
- Subsea Pumping
- Hydrate Remediation
- Flowline Pigging
- Jumper Flushing







Decommissioning Services – CGBS Attic Oil Recovery



WBS 7 – Substructure Removal Activities

- **Trapped fluid characterisation & removal from Concrete Gravity Based Structures**

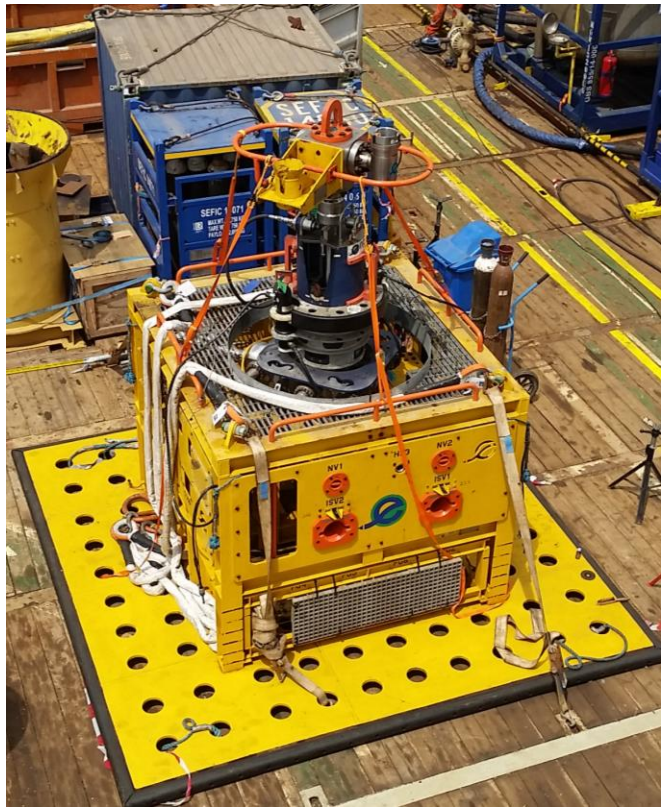
HUNTING

Subsea Intervention &
Decomissioning Services

Flow Intervention Services

15K FIS SSM

10K FIS SSM



10K Lightweight FIS SSM

3

Well Decommissioning

4

Facilities & Pipelines Permanent Isolation and Cleaning

1 Project Management

- Decom Core Team (exc. management/ support allocated elsewhere)
- Decommissioning Programme preparation
- Partner and stakeholder interaction
- Company overheads
- Insurances
- Studies to support Decommissioning Programme and scope definition method development
- Decommissioning Programme reporting / close out
- Admiralty charts, FishSafe etc.
- Compliance and verification costs

2 Post-CoP Running Costs

- Contractor project management
- Onshore and offshore support teams
- Integrity management, inspection and maintenance
- Baseload platform utility (including power, water, air)
- Diesel and other fuels
- Logistics / accommodation associated with platform operations

3 Well Decommissioning

Flow Intervention Services

- Well kill
- Pre-P&A Flushing
- Thru Tree P&A

4 Facilities & Pipelines Permanent Isolation and Cleaning

Flow Intervention Services

- Flushing
- Pigging
- Cleaning
- Isolations

5 Topsides Preparation

- Contractor project management
- Module, process and utilities separation
- Upgraded platform facilities
- Onshore and offshore support teams
- Logistics costs (e.g. supply vessels and helicopters) associated with topsides preparation

6 Topsides Removal

- Contractor project management
- Preparation for removal e.g. reinforcements, lift point (re)instatement
- Structural separation for topside removal activities
- Vessel activities (e.g. HLV, DSV)
- Topside removal activities
- Sea fastening and transportation
- Load onto quayside
- Onshore and offshore support teams
- Logistics costs (e.g. supply vessels and helicopters) specifically associated with topsides removal

7 Substructure Removal

CGBS Attic Oil Recovery

- Fluid Characterisation
- Trapped Fluid Recovery

8 Topsides and Sub-structure Onshore Disposal

- Contractor project management
- Cleaning and handling of hazardous waste
- Dismantling
- Waste management
- Transportation, storage and maintenance of equipment to point of sale, recycling, re-use or safe disposal
- Onshore and offshore support teams

9 Subsea Infrastructure

- Contractor project management
- Vessel (e.g. DSV, CSV, etc.)
- Studies to support subsea programme
- Pipeline / bundles / cable / riser activities (removal, trench and bury, rock cover etc.)
- Mattress activities
- Subsea structure activities (removal, bury, rock cover etc.)
- Sea fastening, transportation
- Load onto quayside
- Waste management
- Onshore and offshore support teams
- Logistics costs (e.g. helicopters) specifically associated with subsea infrastructure

10 Site Remediation

- Contractor project management
- Oil field debris clearance around structures
- Oil field debris clearance around pipelines
- Waste management
- Seabed verification activities (over trawl or survey)
- Onshore and offshore support teams
- Logistics costs (e.g. helicopters) specifically associated with site remediation

11 Post-Decommissioning Monitoring

- Contractor project management
- Monitoring of residual infrastructure / material
- Navigation aids (incl. maintenance)
- Onshore and offshore support teams
