Hackathon – Shining a light on the Supply Chain

Bill Cattanach OBE,
Head of Supply Chain, Oil & Gas Authority

What is a Hackathon & Why have one?

- An event where people come together to solve problems
- SNS forum to improve P&A Operations and reduce costs
- OGA & SNS Operators held two Hackathons earlier this year
- Platform for Supply chain companies – Innovative solutions

Westminster MP Kirsty Blackman

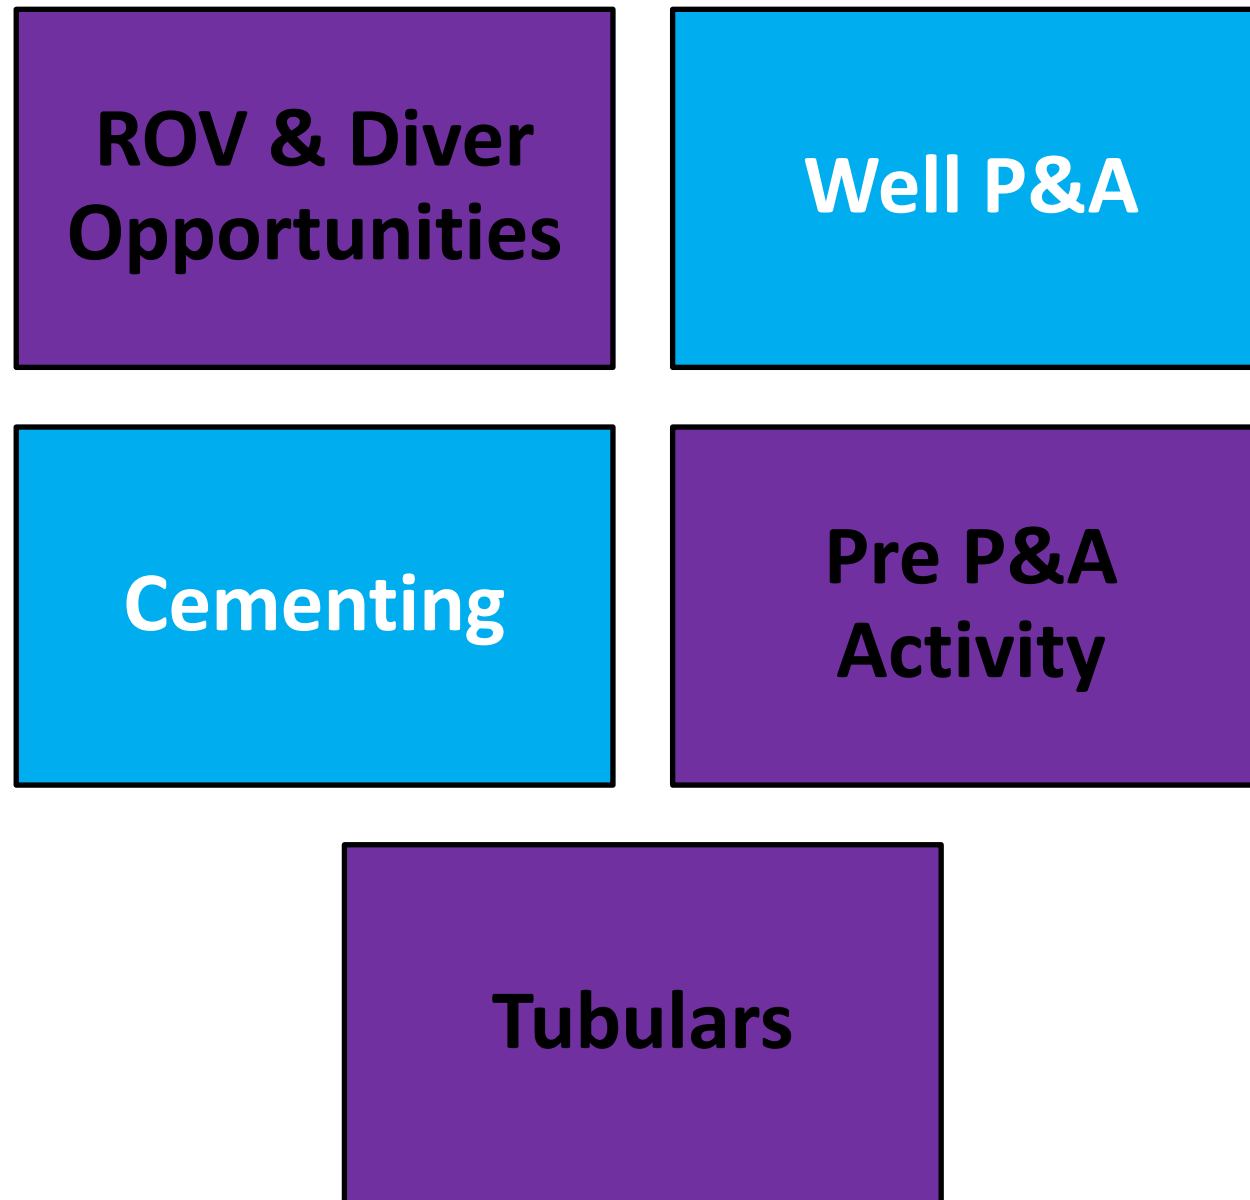

Brainstorming session

SNS and Irish Sea Wells

From OG UK 2015 Insight survey	2015 costs £m / well	Less 35% this becomes £m /well
SNS/ IS Platform	3.0	2.0
SNS / IS E&A	8.8	5.7
SNS / IS SS	9.6	6.2

Total Wells	1050	Platform wells	973	Subsea Wells	77
South North Sea	942	South North Sea	872	South North Sea	70
Irish Sea	108	Irish Sea	101	Irish Sea	7

Five Key Themes Explored

Each theme was led by an Operator and sub divided into specific subjects for discussion

High level summary- what we found

Full integration of all SNS operators into 1 team

Guidelines and standards

Supply Chain willingness

Lessons lost by starting from scratch each time

Technology is a consistent theme

Clubs for rigs, barges & equipment

Leadership is not visible

Contracting not working for supply chain

What's next for the Supply Chain

➤ 125 Potential solutions gathered – Operators currently studying

➤ Workshop to introduce the enabling technologies

➤ Report will be published on OGA website

➤ Working closely with OGTC to help pull concepts through

➤ Collaboration – between the service sector as well as with operators

Anything is possible if you just believe and put your mind to it
